Rohan Gupta

Machine Learning · PyTorch · Recommender Systems

Kanpur · +91 90000 10005 · rohan.gupta@example.com · github.com/rohan-gupta-ml

Summary

Mathematics and Computing student focused on ranking and recommendation models, from feature pipelines to offline evaluation.

Experience

Machine Learning Intern · StreamVeda (OTT)

May 2025 – Dec 2025

• Trained a two-tower retrieval model in PyTorch on 50M watch events; recall@50 improved 11% over the baseline.
• Built Spark feature pipelines on Databricks for 30 user and title features.
• Designed the A/B test for the new home row; it lifted watch time per user by 3.2%.

Projects

Learning-to-Rank for News

github.com/rohan-gupta-ml/news-ltr

• LightGBM LambdaMART ranker; NDCG@10 of 0.47 on the MIND dataset. Experiments tracked in MLflow.

Kaggle: H&M Recommendations

github.com/rohan-gupta-ml/hm-recs

• Top 4% (silver medal) with a candidate generation plus re-ranking pipeline.

Skills

ML: PyTorch, TensorFlow, scikit-learn, LightGBM, recommender systems, learning to rank
Data: Python, SQL, Spark, Databricks, Pandas
MLOps: MLflow, Docker, Kubernetes (basics), Git
Maths: Probability, statistics, hypothesis testing, linear algebra

Education

Integrated M.Sc. Mathematics and Computing · IIT Kanpur

2021 – 2026 · CPI 8.8/10

Certifications and achievements

• Paper: 'Cold-start re-ranking with side information', student workshop, CODS-COMAD 2025
